

MIGRATOR for SharePoint

MetaVis MIGRATOR for SharePoint makes it easy to migrate content and objects between SharePoint sites, site collection or servers. Whether you are consolidating, upgrading, moving to the cloud with Office 365 or simply re-organizing your existing SharePoint environment, **MIGRATOR** provides a convenient and familiar way of moving your SharePoint data. Users can easily load files and import content from network drives, Exchange, Outlook and legacy systems into SharePoint. Migrating to SharePoint has never been this easy!

MetaVis MIGRATOR is part of the MetaVis Information Architecture Platform and makes it easy for users to add the capabilities they need such file share, Exchange Public Folder or Outlook migration as needed. This eliminates the need to multiple products.

MIGRATOR uses out-of-the-box SharePoint interfaces (APIs) and does not require any components or agents installed on the SharePoint server making it ideal for migrating to the cloud. When migrating to Office 365 SharePoint, **MIGRATOR** allows you to maintain your Created and Modified metadata in Office 365 SharePoint.

MetaVis MIGRATOR supports specific SharePoint 2010 features such as Term Stores and Document Sets making it easier for users to take full advantage of SharePoint 2010 functionality and plan or execute a 2010 migration strategy.

Why buy a multiple migration solutions when you can own a complete solution from **MetaVis**?
