

**MetaVis SUITE** for SharePoint is a complete set of tools for designing, deploying, migrating and managing SharePoint 2010, 2007, 2003, BPOS and Office 365 SharePoint. The **SUITE** includes metadata and migration software to help design taxonomy structures, and move and classify content in SharePoint for improved site documentation, search and navigation. **MetaVis** does this easily without the need for installing server side components or agents making it ideal for the cloud and Office 365 SharePoint.

The **SUITE** includes:

**MetaVis ARCHITECT**  
**MetaVis CLASSIFIER**  
**MetaVis MIGRATOR**

Built on the MetaVis Information Architecture Platform, the **SUITE** provides one integrated user interface for designing, migrating and managing SharePoint.

**MetaVis SUITE** helps you to take full advantage of Microsoft's metadata management functionality in SharePoint 2010 and enhance it. The **SUITE** provides tools for every step of the process from creating and visualizing your site structure to quickly migrating content to SharePoint 2010 or SharePoint online.

Designed to be used over and over again, **MetaVis** allows you to take back control of your SharePoint sites and organize them by assigning metadata values. Make your SharePoint 2010, 2007, 2003 and Office 365 SharePoint content compliant, and "findable" with just a few clicks.

- **Organize Your SharePoint** – combines metadata management software with migration tools to keep your SharePoint sites organized and searchable.
- **System Wide Awareness** – provides a central location to maintain SharePoint taxonomies for a system wide awareness of your taxonomy structures.
- **Ease of use** – uses a familiar graphical interface; copy and paste or drag and drop items in bulk when migrating or classifying.
- **Governance** – ensures that sites follow consistent standards and is easily searchable for eDiscovery.
- **SharePoint API Support** – support out-of-the-box SharePoint interfaces (APIs) and does not require any components or agents
